Jennifer,

Consistent with EPA guidance for schools, the Santa Monica-Malibu School District voluntarily developed and is implementing a best management plan to address PCBs campus-wide at Malibu High School and Juan Cabrillo Elementary School. EPA's involvement and approach has been documented in several letters which we have previously provided to you. For specific questions regarding the implementation of the District's plan at specific school facilities, it's appropriate for you to please contact the District (smmusdenvIRONMENTALinput@environcorp.com) on implementation of the procedures they are following.

Regards,

Kelly

Kelly,

I have read the exchange below. Please explain to me why testing would be delayed by moving orchestra risers?

Please explain the detailed testing and dates that occurred in to room 303.

In addition, why when a classroom tests above the EPA guidelines set in. Other air and wipe tests isn't the EPA seeing this as an indication of a PCB problem in the room and requiring source testing?

Does the EPA think that cleaning the PCB's up will remove them from continuing to vaporize from their source?

Thank you in advance for your prompt reply.

Jennifer deNicola

I received this yesterday. This is what I meant about Environ ...

Sent from my iPhone so please excuse typo's :)

Hi Joni-

I just spoke with the contractor from Environ, the company the school worked with on the testing, and she confirmed that Room 303 has been cleared.

Hope this helps- thanks!

Kelly

Hi Joni-

I am still confirming this; I'll be in touch as soon as I have more information.

Thanks!

Hi Kelly,
Any word on Room 303 at MHS.
I look forward to hearing from you.
Very Sincerely,
:) Joni Marcellino

Hi Kelly,
Is it possible for you to confirm this for me?
Thank You !!!
:) Joni

On Aug 19, 2014, at 5:00 PM, Wedell, Kelly wrote:

Hi Joni-

Room 303 had delayed sampling due to the movement of the orchestra risers. As a result, the testing results were not expected until Friday 8/15 or Monday 8/18. If the room was open today (8/19), the results may have indicated that the room was safe. The district's website has not been updated with room openings since August 14th, and therefore we do not have the most up-to-date information on rooms that have been cleared.

Thanks,

Kelly

Hi Kelly,
Can you please explain to me why students were allowed to enter room 303 ... Today... The first day of school... David Jackson promised me... and a friend of mine... that if a room in a building still tested positive to toxins that the whole building would remained closed. I am super upset to hear that room 303 has not been released ... and that students were allowed to enter that room... as well rooms 301 and 302. Please see the email below that I received yesterday from David Jackson - MHS Principal.
I look forward to hearing from you.
Very Sincerely,
Joni Marcellino

Opening Tomorrow

Dear Dave,
I just received the
letter from Kelly
Wedel from the EPA
attached below. I am
wondering how this
effects the reopening
of Building F - Music
and
Drama 301,302,303
Buildings G -
Woodshop/Special Ed
I look forward to
hearing from
you... Especially
since I have yet to
hear a response to my
email to you dated
August 15 with the
same question. I am
also wondering about
the quad that is roped
off.
Thank You !!!
:) Joni Marcellino

Dear Dave,
Regarding the letter
from Kelly Wedel
from the EPA
attached below. Per
our conversation
... You told Lea and I
that ... "If there is one
room not passing in
any building the
entire building will

remain shut down". I
am wondering how
this effects the
reopening
of Building F -
Music and
Drama 301,302,
303
Buildings G -
Woodshop/Sp
ecial Ed
I look forward to
hearing from you.
Joni
